TO: Whom it may concern

We have had crop insurance for many years and consider it an important part of our risk management. However we felt the agent we were dealing with just wasn't working in our best interest, so in 2007 we decided to switch to Harry Daisey. He gathered all the information on our yield history and spent a significant amount of time working with us educating us about how the program worked as well as correcting the numerous mistakes our previous agent made in setting up our policy. We feel this made a difference with the claim we filed that year as our farms were divided up, something our previous agent did not do. The claims adjuster was wonderful to work with, the claims payment was prompt and was a big improvement over our past experience with crop insurance claims.

Even though we do not use the GPS mapped acres for acreage reports, we feel they are a valuable benefit. We use them for recording inputs and yields on farms. They also provide us with an accurate acreage for each field, which helps keep input costs down.

We feel you could not go wrong to allow Harry Daisey to handle your crop insurance.

Sincerely,

Bruce Lambertson
